

DivineMarkets: AI-Powered Options Intelligence

DivineMarkets is a cutting-edge SaaS platform that uses artificial intelligence to scan the stock market, identify high-probability options trades, and recommend the top 10 daily plays - 5 calls and 5 puts - to maximize profits.

Problem

Retail and institutional traders struggle to consistently find profitable options trades amid information overload and market volatility.

Solution

Our AI models analyze market confidence, news sentiment, technical trends, and risk metrics to deliver optimized options signals in real-time.

Features

- Real-time call/put signals
- AI-generated entry/exit points
- Bankruptcy risk detection
- Telegram & SMS alerts
- Multilingual support

Business Model

Monthly SaaS subscriptions with premium access tiers, offering signal accuracy history, in-depth analysis, and automation APIs.

Market Opportunity

The global options trading market is valued at over \$13T with exponential growth in retail adoption and AI finance tools.

Traction & Roadmap

Built and deployed backend/AI/frontend. Currently onboarding early users. Next steps: model training, real capital deployment, global expansion.

Call to Action

We are seeking early-stage investors, AI finance partners, and growth users. Join us in shaping the future of options trading!
